This application is in condition for allowance except for the following formal matters:

Newly submitted claims 18-25 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: Group I, claim 16, directed to a system, Group II, claims 18-25 directed to a method. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be performed with an apparatus that does not include a controller comprising an input device, a manipulator, and the clutching assembly as set forth.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 18-23 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim 16 is objected to because of the following informalities: In claim 16, line 8, "clutch" should be "clutching". On line 9, "the one of the..." lacks antecedent basis. Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
